### **About Condor**

As Germany's most popular leisure airline, Condor has been taking its guests to the world's most beautiful holiday destinations for more than 65 years. Every year, more than nine million guests fly with Condor from the nine largest airports in Germany, from Zurich in Switzerland and Vienna in Austria to around 90 destinations in Europe, Africa and North America. Condor operates a fleet of over 50 aircraft, which are maintained by the company's own maintenance operation, Condor Technik GmbH, according to the highest safety standards at the Frankfurt and Dusseldorf locations. In spring 2022, Germany's most popular vacation carrier unveiled its new brand identity: Condor is vacation and vacation is stripes. Inspired by parasols, bath towels and beach chairs, Condor now wears stripes in five colours. This clearly shows the development from a vacation airline to a unique and unmistakable vacation brand. The new design was unveiled with the first A330neo, which will take off for Condor from fall 2022. As the German launch customer, Condor will then be flying 16 A330neo long-haul aircraft. Thanks to state-of-the-art technology and maximum efficiency, the latest-generation 2-liter aircraft is the European front-runner with 2.1 liters per passenger per 100 kilometres and maximum customer comfort. Moreover, Condor will receive 41 brand-new short- and medium-haul aircraft of the A32Xneo family from 2024 and will therefore enable a more responsible way of travelling in the future.
